DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 3-7, and 11, drawn to methods of treatment using an interleukin receptor, classified in class 424, subclass 85.1.
- II. Claims 2, 8-10, and 12, drawn to methods of treatment using antibodies, classified in class 424, subclass 143.1.

The inventions are distinct, each from the other because of the following reasons:

The methods of Group I are distinct from those of Group II because they require different reagents. The receptor fragments of Group I are structurally unrelated to the antibodies of Group II.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
